ERRA PATER.

The Prognostication for euer
of Erra Pater.

A I finde in the Science of
Astronomie, there be foure
manner of Cholers in mans
body, of the foure complecti-
ons. The first is bloud, the second black
choler, the third flumes, and the fourth
yealow choler: and if one of the foure
lack all the body will be forthwith dead,
for as much sustayneth one of them the
body as the other.

And each of them ought to be at a cer-
taine, for if one of them surmount ano-
ther all the body shal have damage ther-
by, and all foure be perillous: for if the
blond surmount the other it will sone
destroy and overcome the body & make
htm to dye: for it gathereth and likewise
congealeth enen right on the heart and

the breath, and in that manner (lessening) by little and little is overcome and dead, but all that time when the great course taketh him it may sone be asswaged by taking away a little blood from him, for then all will asswage of that perill.

Also the black choler is right perillous, and if they surmount the other they doe great damage to the body by many and divers meanes, for they cause the body to fall, as the euill sicknesse, and to lose his wit and knowledge and become a foole, and they cause all the body to be full of euill scabs, and oft times to be mesill, and they make a man to be fearefull and a coward, and of many euill manners. And by hearbs, flowers, fasting, abstinence, drinks and medicines, they may be asswaged.

The flumes that be white be right perillous also when they surmount the other cholers of the body, and doe great damage and hurt: for they engender Goutes, and many other euill sicknesses that be cold, and they hurt also the fete, the legs, the knees, the hands, the raines, and the teeth, and make the mouth and

the breath stincking, and the Nose and the eares, and causeth many other diseases and sicknesses. And they may be asswaged by hearbes, flowres, rootes, drincks, medicines, & also by vomiting.

Also the yealow cholers be perillous, for when they surmount the other cholers in a mans body, they assorbent the heart, and trouaile the braine, and maketh all the members feeble and soft, and taketh away the will and appetite from the body that it may neither eat nor drinke, and also they change a mans colour, and maketh him to lose his sight and become blinde. And they may be asswaged by hearbs, flowres, rootes, and by vomiting.

The foure humours be of foure complexions, and they haue the domination of the body foure times in a yere: and each of them a quarter of a yere.

It is to be vnderstode that in the yere is twelue Moneths, and in the twelue moneths is fiftie and two weekes, and in the fiftie and two weekes is three hundred three score and five dayes, and in the three hundred three score & five dayes,

And by the manner of these foure seasons, euery man may keepe him from all the contraries of meates, drinckes and clothing, and from all other contraries. And if a man will keepe himselfe after the manner which is rehearsed in this booke, hee shall neuer haue infirmities of the body by the grace of God.

Take Pelliter of Spaine and chaw it in the mouth, for it is good to spurge the head and the body. And eate Fenell seede and Comin seede, for each of these seedes destroy the flumes, whercof all these evils in any mans body come.

Heere he sheweth of all the dismall or perillous dayes that commeth in the yeere.

Maisters of Astronomie and Physicke that this craft first found, telleth the most perillous and the most dangerous dayes in the yere. In which if any man or woman be let blood of wound or beine, they shall dye within xxi. dayes following. Or who so falleth into sicknesse on any of these dayes, they shall neuer escape it till they be dead. And who so taketh any great iourney in any of these dayes, to goe from home hee shall be in danger to dye ere he come home againe. And who so weddeth a wife in any of these dayes they shal soon be parted, or else they shal liue together with much sorrow. And who so beginneth in any of these dayes

any great worke, it shall neuer come to
good end : and these are the dayes fol-
lowing :

That is to say :

In Ianuary are eight dayes, that is to
say, the first, the second, the fourth, the
fift, the tenth, the fiftēneth, the seauen-
tēnth, and the ninetēnth.

In Februarie are thre dayes : the viij.
the x. and the xviij. y

In March are thre dayes, the xv. the
xvi. and the xix. iij

In Aprill are two dayes, the xv. and
the xxj. iij

In May are thre dayes, the viij the xv

In Iune are two dayes, the iij. and

In Iuly are two dayes, the xv. and
the twentieth. viij

In August are two dayes, the xix and
the xx. bliij

In September are two dayes, the viij.

In October is one, the viij. day. x

In Nouember are two dayes, the viij.

In

The Prognostication

An December are three dayes, the vi.
and vii. and the xj. It alij dicunt, the xv.
and the xvi. 19

And who so will learne the Cani-
cular dayes, which are dayes of great
daunger and perill, as Clarke say, and
they begin the xv. Kalend of August and
dureth to the fourth Nonas of Septem-
ber, which season is very perillous to take
sicknesse, and it is also perillous to take
drinks and medicines, or to let bloud, but
if it be great neede, and then it must be
after the middell of the day.

Here beginneth the distance
betweene the Signes.

It is to be vnderstood that there is a
circle in the Firmament, that is called
Zodiacke, & is diuided into twelue euen
parts, and of those parts be called the
xij Signes in the Latine, and these be
their names: Aries, Taurus, Gemini,
Cancer, Leo, Virgo, Libra, Scorpio,
Sagittarius, Capricornus, Aquarius, and
Pisces.

These twelue signes are in complec-
tion like vnto the foure Elements, that
is

is to say, the Fire, the Ayre, the Water,
and the Earth: the Fire is hote and
dry, his Element is likened vnto the
Ram, the Lyon and the Shooter, for these
be hot & dry: also the Ayre is hot & moist,
his Element is likened to the Children,
the Ballance and the Water-bearer, for
they be hote and moist. The Water is
moist and cold, for to the water is likened
the Crab, the Scorpion, & the Fish. The
Earth is dry and cold, to the Earth is li-
kened the Bull, the Maid, and the Goat,
for they be dry and cold.

And every one of the Signes is di-
uided into thirtie even parts, & these parts
are called degrees, and every degree is di-
uided into threescore even parts, & these
parts are called minutes, and every mi-
nute is diuided into threescore even parts
and these parts be called seconds, and so
forth to the thirds and fourths.

It is to be vnderstood, that there are
seauen Planets, as Saturnus, Iupiter,
Mars, Sol, Venus, Mercurius, and Luna.
These be the seauen moueable Stars.
The aforesaid twelue signes take great
power

The Prognostication

power and might of the seauen Planets, and the seauen Planets take great power of the twelue signes, for the Planets be to the Signes, as the soule to the body, & the signes to the Planets as the body to the soule. For like as the body may doe nought without the Soule, no more may the soule without the body, no more may a signe without the seauen Planets.

Saturnus is the highest, and next beneath Saturnus is Iupiter, beneath Iupiter Mars, beneath Mars, Sol, beneath Sol, Venus, beneath Venus, Mercurius, beneath Mercurius, Luna.

The wise Philosophers say, it is from the Earth to Luna, $\text{xx. M. lxx. C. l. miles.}$

From Luna to Mercurius, is $\text{xxj. M. lxx. C. xij. miles and a halfe.}$

From Mercurius to Venus as many.

From Venus to Sol is $\text{xxiii. M. lxx. C. and xxxviii. miles.}$

From Sol to Mars is $\text{xx. M. lxx. C. and five and twentie miles.}$

From Mars to Iupiter is threescore eight thousand, seauen hundred and xxi. miles.

From

of Erra Pater.

From Iupiter to Saturnus as many.

From Saturnus to the Firmament,
is fiftescore \mathfrak{D} . iiii. \mathfrak{C} lxxxv. miles

The summe of all these miles is seaven
hundred and eightene \mathfrak{D} . four \mathfrak{C} . thre
score and thre miles.

Hereafter followeth a coniunction of
the change of the Moone.

When the Prime is on this Letter
A, the third day before the Prime, the
sixth houre shall be the change of the Moon.
(And you shall begin to tell your houres
at midnight, for a day naturall is from
midnight to midnight) When the prime
is on this Letter B, then the third day,
it shall change at fourth houre, that is,
after midnight. When it chanceth on this
Letter C, then the fourth day and eight
houre When it is on this letter D then
the fourth day at twentieth houre. When
it is on this letter E, the fourth day and
eighteenth houre. When it is on this
letter F, then the third day, and sixteenth
houre. When it is on this letter G, then
the third day, and sixteenth houre.

The Prognostication

The disposition of the xij. Monethes
vpon bloud-letting.

January.

In the Moneth of January, let the not
blood in the first day, for it is perilous,
nor the second day, nor the fifth day, nor
the x. day, nor the xv. day, nor the xix. day,
nor the xx. day, nor the xxv. day but as of-
ten as thou wilt drink good white wine
fasting, and also take good hærde of the
dayes that be aboue witten, for they be
perillous for to bleed on, except the signe
be right good for bloodletting.

Februarie.

In the month of February, eate no po-
tage made of hocks or mallows, for that
is venim. And if thou hast need to bléede
on thy wrist, or thy thomb, bléed not on
the iij. day, nor on the vj. day, nor on the
viij. day, nor on the xvi. day, nor on the
xviij. day, but that the signe be very good
and thou haue great néede.

March.

In the month of March eate Figs,
Reisens

of Erra Pater.

Keilsons, and sweet meates and dzincks
and eate hot meates, and let the blood
on the right arme on the v. day, or on
the vii. day, or on the xvii. day, for that
is good against all manner of Feuers,
but beware thou blede not the first day,
nor the xv. day, nor the xvi. day, nor the
xix. day, nor the xxviij. day, if thou maist
chose and if thou doe looke the signe be
very good.

Aprill.

In the moneth of Aprill blede on the
left arme on the third day, or on the xi.
day, or on the xv. day, and thou shalt
haue no great head ache, nor lose thy
sight of all that yere, and vse fresh and
hot meates, but blede not the viij. day,
nor the xij. day, nor the x. day, nor the
xx. day, for these dayes be not good for
bleeding.

May.

In the moneth of May, rise earely,
and eate and dzinke betime, vse good
meates and dzincks, but eate neither of
head nor foote while that last, and let
the blood on the first day, or on the eigh-
teenth day, on which arme thou wilt, or

The Prognostication

on the xxvii. day, or on the xxviii. day,
and it shall much helpe thee against all
manner of euill, but beware that thou
bleed not the third day, nor the sixt day,
nor the xvj. day.

June.

In the month of June some Physicians
say, that it is good every day to drinck a
quantitie of cold water fasting, and rule
thee of thy meate and drinck, and if thou
haue need bleed on the xxviii. day, for that
is good, but beware that thou bleede not
on the viij. day, nor on the x. day, nor the
xv. day, nor the xvi. day, nor the xv. day.

July.

In the moneth of July, keepe thee from
Lechery, for then the braine and the hu-
mours are alwayes open, and bleed not
in this moneth. but if thou haue great
need, and then beware alway that thou
bleed not on the xiiij. day, nor on the xv.
day, nor on the xvi. day, nor on the xv.
day, so it is dangerous.

August.

of Erra Pater.

August.

In the month of August, eate no manner of woerts, noz any manner of hot meates and dzincks of spicerp, noz blæd not the first day, noz the xx. day, noz the xxix. day, noz the xxx. daye. The other dayes thou maist blæd for great nêed, if the signe be good for bloodletting, but not else, and if thou louz to kêpe thy body in good health.

September.

In the month of September all manner of fruits that is ripe and not infected, is good for to eate, & blæd not the xvii. day, noz on þ̄ xviii. day, of the drop sic, phrensie, palse, noz of the falling euill, dread thêe not of all that pære, & if thou hast nêede to blæd moze, beware that thou blæd not the iii. day, noz the iiii. day, noz the xvi. day, noz the xxi. day, noz the xxii. day.

October.

In the month of October, dzinck good and wholesome wine, & blæd not except great nêed make thêe, and looke that the

The Prognostication

signe be very good, but yet beware that thou bléed not on the third day, noꝝ the first day, noꝝ the xxiii. day, and thou wilt doe well,

Nouember.

In the month of Nouember, bléed not but foꝝ néede, foꝝ all the blood is gathered that time vpon the head veine, bath not but hent thee a little of grasing, foꝝ then all the humours bee ouerquick to bléede, and if case bee that thou haue great néed foꝝ to bléed, beware of the fift day, the vi. day, the xv. and the xix. day, the xxviij. day and the xxx.

December.

In the month of December, bléed not but if thou haue great néede foꝝ thy ease. And in case thou haue moze néed to bléed, beware of the vii. day, the xv. day, the xvi. day, the xxi. day, and the xxii. day, but bléed on the xxvi. day, foꝝ it is right good, and in this month come not nye the fire with thy thanks.

In the yeere that Ianuary shall en-
ter on the Tuesday, the winter shall be
changeable and not stedfast, for in the
Prime of truth it shall freeze, and that
shall hurt soe the Rie, the Wines, and
the flowers, that Summer shall be dry,
hot & burning, insomuch that the hearbs
of the Gardens shall haue no power to
come out of the ground. All things shall
be deere saue onely Corne, many men
shall dye of the bloudy flux, there shall be
no tidings of thunder, lightning, & tem-
pest, but all flesh shall be deere, many
wines shall turne.

of Erra Pater.

In die Mercurij. That is Wednesday.

In the yere that January shall enter on the Wednesday, the winter shall be temperate, but in the ende there shall be snowes and frosts, the prime time shall be rainy great abundance of Corne, of Wine, of fruits, of Hay, of Grasse, and generally of all good things. The Summer shall be little cloudy, by the which thereof shall come great sicknesse. Poore labourers, as handy crafts and artificers shall gaine meetly well that yere: there shall be many thieues, by whom the meane people shall be sore pilled and discomfited, great warre, battaile and slaughter shall be towards the midst of the yere, by the which shall come great good to some men. In the end of the yere shall be diuers pestilences, botches, and falling evils, especially next the Sea.

In die Iouis. That is Thursday.

In the yere that Ianuarie shall enter on the Thursday, the Winter shall be long and most part dry, and the yere shall be very wholesome: the Prime
time
